best practices**

WEBINARS CALENDAR

2021

For info:
info@fiamgroup.com

Here the new **calendar** with upcoming webinars dates to explore issues related to the tightening world and not only: **a concrete help for you and for your company competitiveness.**

The topics are chosen according to suggestions of the last year participants and the requests received over the last months.

The result is a calendar made of **four** different **subjects** concerning: the **tightening automation** from COBOT to semi-automatic tightening systems, the **ergonomics** of the workstation and its **interconnectivity** with productive systems, **service** and correct maintenance and finally the **in-process controls** to guarantee excellent quality of final product.

The first webinar, in **English language**, will be **Wednesday, April the 28th 4.00 pm** CET

“Interconnectivity for In-Process Controls. How to keep processes under control”

Speaker: Marco Perreca, Sales Area Manager

This webinar provides an **interesting focus** on **methods** and **tools** for **achieving accurate processes** and **final product quality**.

SUBSCRIBE HERE FOR THE WEBINAR ON WEDNESDAY APRIL THE 28TH!
